

CAREER GUIDE INFORMATION

The STARBASE ROBINS Program is a 5-day educational program for 5th graders at the Museum of Aviation. It provides a unique curriculum, which includes hands-on science and math, teamwork, substance abuse avoidance, and goal setting. The first day at STARBASE, the students use the ***dreams+action =Reality*** program to choose a career goal. One way we help them work towards their goal is to find a professional from the community to come talk to the class for about 30 minutes. Listed below are some of the suggestions of helpful information for discussion between career guides and students.

1. Share the steps you took to achieve success in your career.
2. Try to suggest positive actions for the children to take now to help make their dreams become a reality.
3. Stress staying drug free, crime free, and gang free.
4. Stress staying in school at least long enough to finish high school.
5. How do you solve problems on the job?
6. How do you use teamwork on the job?
7. Answer any of the questions the children may have, but do not allow them to invade your privacy. (They do not need to know how much you make).
8. Do not accept phone numbers and/or addresses from the students.

**Thank you for helping us develop our
country's greatest natural resource – OUR CHILDREN**

YES!!!

I would like to volunteer to be called as a STARBASE ROBINS Career Guide. I understand that career guides are called for students according to their career goals, and this will be subject to my availability. Once I commit to a date for a visit, the students are depending on me to participate. If my schedule changes, I will give sufficient notice so that another career guide may be scheduled.
